

WEEKLY PROJECT PROGRESS REPORT (WPPR)– 1

For week commencing 27 March 2026

Programme: BCA (AI,Cloud Computing & Devops)

Student Name: Kithu Manoj

Register Number: **23BCAICD047**

WPPR: 1

Internal Guide's Name: Mrs Manjula

MAJOR PROJECT Title:

Cloud Cost Intelligence Platform for Finance

Targets set for the week:

Understand the concept of cloud cost management and its importance in finance
Collect and design a dataset representing cloud usage and cost
Study tools like Python, Pandas, Excel, and Power BI
Design a basic architecture of the system
Plan the workflow for data processing and visualization

Progress/Achievements for the week:

Studied cloud computing cost structures and pricing models
Created a sample dataset in Excel containing service type, cost, region, and usage details
Installed and set up Python environment using Google Colab
Learned and implemented basic data analysis using Pandas
Designed the system architecture including data collection, processing, and visualization stages
Learned how Power BI can be used for dashboard creation

Future Work Plans:

Perform detailed data cleaning and preprocessing
Implement cost analysis such as service-wise and monthly cost calculation
Generate processed dataset for visualization
Create interactive dashboards in Power BI
Improve user interface and reporting features

Implementation shown:

☐

Yes

☐

No
