

WEEKLY PROJECT PROGRESS REPORT (WPPR)– 2

For week commencing 4 April 2026

Programme: BCA (AI,Cloud Computing & Devops)

Student Name: Kithu Manoj

Register Number: **23BCAICD047**

WPPR: 2

Internal Guide's Name: Mrs Manjula

MAJOR PROJECT Title:

Cloud Cost Intelligence Platform for Finance

Targets set for the week:

Perform data cleaning and preprocessing on the cloud cost dataset
Implement cost analysis using Python and Pandas
Calculate service-wise, project-wise, and region-wise cost distribution
Generate monthly cost trends
Prepare processed data for visualization

Progress/Achievements for the week:

Imported the dataset into Python (Google Colab)
Cleaned the dataset by handling missing values and correcting data formats
Performed service-wise cost analysis using groupby functions
Calculated region-wise and project-wise cost distribution
Generated monthly cost trends for better understanding of spending patterns
Identified high-cost services and major cost contributors
Exported the processed data into a new Excel file for Power BI usage

Future Work Plans:

Connect the processed dataset to Power BI
Design and develop interactive dashboards
Create visualizations like pie charts and line graphs
Implement filters and slicers for user interaction
Analyze results and generate insights for cost optimization
Explore basic forecasting techniques for future cost prediction

Implementation shown:

☐

Yes

☐

No
